Why visitors visit 92nd CMEF

Who attended

What the Community is saying

It was a great pleasure to attend the China International Medical Equipment Fair (CMEF) 2025, where I was highly impressed by the advanced innovations in medical treatment and rehabilitation, technologies that align perfectly with Thailand's regional medical hub policy. My participation included delivering a speech on the WeTalk stage. It's a strategic opportunity to emphasize our forward policy and potential for robust medical cooperation. This engagement was crucial for strengthening the regional supply chain cooperation while simultaneously allowing me to connect with Chinese top-tier entrepreneurs who are potential partners for future investment and collaboration in Thailand.

Mr. Kajititi Wiwatwanont, Consul-General of Thailand in Guangzhou

Product Highlights

**SINOPHARM CMDC**

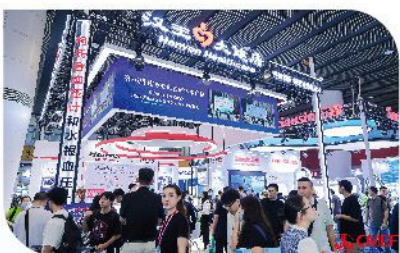

Sinopharm CMDC participated in the exhibition under the theme “Gathering Momentum through Digital Intelligence for Long-Term Development, Creating a Winning Future with Smart Manufacturing.” The company showcased its achievements across multiple fields, including the R&D and manufacturing of medical devices, industry infrastructure, digital innovation, and industrial ecosystem collaboration. It also launched the Sinopharm CMDC Imaging “Yingmai · Smart Connect” holistic solution, empowering the digital and intelligent transformation of the medical device industry. These efforts aim to provide the public with more economical, reliable, and accessible medical equipment, thereby contributing to the Healthy China Initiative.

**Browiner**

Browiner made a powerful appearance with multiple flagship intelligent imaging products, injecting new momentum into medical imaging. Its portable DR section drew large crowds, while its off-site intelligent imaging solutions attracted attention from domestic and international clients. With its breakthrough compact design and extended battery life, the products overcome the spatiotemporal limitations of traditional imaging examinations, supporting applications both inside and outside hospitals, such as primary healthcare screenings, tuberculosis screenings, and emergency rescue operations. The new large-panel integrated mobile C-arm CompaX series redefines operating room efficiency and experience with its flexible and precise imaging capabilities, providing clear insights for surgical decision-making.

**SIUI**

At the SIUI booth, solutions in pediatric health, women's health, and urological health became the focus of audience attention. These solutions, guided by clinical application scenarios and powered by artificial intelligence, showcased SIUI's innovative strength. The company presented a range of solutions tailored for primary healthcare and mass screening needs, including its self-developed portable DR and the intelligent breast full-volume ultrasound system IBUS 30Plus. The latest unmanned intelligent emergency medical equipment delivery solution was also unveiled at the exhibition.

**HANVON**

Pioneering a breakthrough in blood pressure measurement, Hanvon leveraged 30 years of AI expertise to digitize the mercury sphygmomanometer, making atrial fibrillation blood pressure monitors accessible under the ¥200 threshold. The company showcased its full range of products, including the next-generation Hanvon Korotkoff Sound Electronic Sphygmomanometer and the groundbreaking KSY3610, which integrates five measurements and intelligently detects atrial fibrillation.

GUANCHUANG

With over 50 patents, including three invention patents, Guanchuang Medical has earned honors such as "High-Tech Enterprise," "Engineering Technology Research Center," "District Growth Enterprise," "Science and Technology Innovation Award," "Provincial Gazelle Enterprise," and "Provincial Specialized, Refined, Distinctive, and New Enterprise." The exhibition featured products like the disposable electric endoscopic linear cutter stapler and components, disposable endoscopic linear cutter stapler and components, disposable suction and ablation electrode, and the retainer (multi-functional serpentine auxiliary electric arm).

WUYANG

At this event, Wuyang Medical displayed its full range of precision products. Aligning with the exhibition's theme of "Health · Innovation · Sharing," Wuyang Medical made a significant appearance with its comprehensive surgical instrument series—covering sports medicine, spinal endoscopy, minimally invasive spine surgery, trauma, joints, and power systems. Several new products were launched for the first time, fully embodying Wuyang's brand philosophy of "quality first, service excellence, and continuous innovation."

SHANDONG HAIDIKE

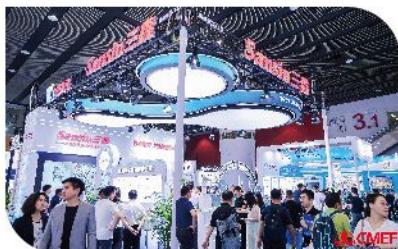

The exhibition featured over 100 types of high-end medical devices, including surgical suture needles and threads, hernia repair meshes, and anastomosis and closure products. For Shandong Haidike, the event was not only a platform to showcase products but also a valuable opportunity to connect with global resources and achieve deep integration of "local industry + international technology." Haidike is using technological innovation to reshape the world's perception of "Made in China," enabling global medical institutions to benefit from high-quality "Created in China" products.

LINHWA

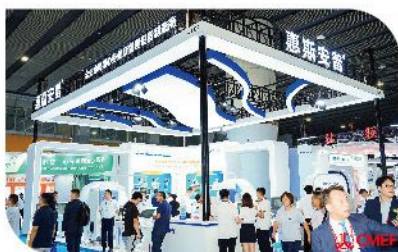

Linhwa made a brilliant appearance with its full range of products and solutions under its brand. Together with many outstanding enterprises, it brought a medical feast featuring the exchange of wisdom and collision of ideas to the global healthcare industry! This exhibition focused on showcasing the products of Linhwa's two major business divisions: Vascular Drug Delivery and Minimally Invasive Interventions. Among them, all its flagship products were on display, including Positive Pressure Anti-Needle-Stick Indwelling Needle, Pre-filled Catheter Flush Syringe, PICC (Peripherally Inserted Central Catheter), Light-Resistant Indwelling Needle, Dialysis Indwelling Needle, Short-Term Dialysis Catheter, Long-Term Dialysis Catheter, High-Pressure Resistant Implantable Venous Access Port, Upper Arm Port, Spinal Port, Surgical Drainage Device, and Silicone Gel Foam Dressing.

Product Highlights

Sansin Medical

With the exhibition theme of "Innovation-Driven, Health-Guarded", Sansin Medical made a brilliant appearance with a variety of cutting-edge products and integrated solutions. The exhibition area was bustling with visitors and featured enthusiastic interactions, fully demonstrating the enterprise's innovative strength and brand charm in the healthcare field. At this exhibition, Sansin Medical grandly presented a number of innovative achievements and integrated solutions in the fields of Blood Purification, Drug Delivery Devices, Diabetes and Vascular Intervention. Several new products, such as Pre-filled Catheter Flush Syringe, Next-Generation Wet Membrane Dialyzer and Needle-Free Syringe, attracted widespread attention from participants due to their innovation.

Huisianpu Medical

As a leading enterprise in the field of Functional Medicine and Intelligent Healthcare Manufacturing, Huisianpu Medical made its appearance at the exhibition with a number of core independently developed equipment. With the full-chain health management solution of "Detection - Intervention - Rehabilitation - Tracking - Evaluation", it demonstrated strong technological strength on the Bay Area stage. Once again, Huisianpu Medical became the focus of the exhibition with its innovative intelligent equipment covering multiple fields. Merchants and customers from more than 100 countries and regions in Europe, Asia, South America and Africa came to consult, experience, and conduct in-depth exchanges with account managers from Huisianpu International Trade Center.

Ruihe Medical

At this exhibition, Ruihe Medical comprehensively showcased its full range of orthopedic products, from Joint Replacement Surgical Robots to Trauma, Spine, Joint, and Sports Medicine series. It focused on presenting the company's innovative achievements and systematic solutions in the fields of Intelligent Orthopedics and Precision Medicine. In front of Ruihe Medical's product booth, domestic and foreign customers streamed in, creating a lively atmosphere for on-site exchanges and negotiations. This exhibition has laid a solid foundation for the company to further expand its global market network and deepen international cooperation.

OBS

OBS made a grand appearance at the exhibition with its products including High-Frequency Electrosurgical Generator, Low-Temperature Radiofrequency Electrosurgical Generator and related Medical Consumables. From booth design to product display, it fully demonstrated its technological accumulation and professional strength in the fields of Electrosurgery and Medical Sensors. During the exhibition, OBS focused on the needs of electrosurgical and Medical Electrode products, bringing a series of cutting-edge products and solutions, which attracted many representatives of medical institutions, industry experts and distributors from home and abroad to stop and communicate.

MedCongress

A total of 90 conferences and forums covering key topics and policies in the medical industry, such as high-quality development of public and private healthcare institutions, intelligent and translational medicine, medical device innovation, robotics and smart healthcare, global expansion of high-quality medical devices, and international medical device regulations. Over a thousand experts, opinion leaders, and industry elites from home and abroad will gather to share insights and contribute ideas.

- SGS Medical Device Global Regulatory Forum

Conference Highlights

High-Quality Development of Public Hospitals

Against the backdrop of deepening healthcare reforms, key priorities for the high-quality development of public hospitals include continuing to advance specialized disciplines, enhancing innovation and translation capabilities, and improving service quality and management standards. On September 27, People's Health hosted the 2025 Public Hospital High-Quality Development Exchange and Summary in Guangzhou. Representatives from relevant regulatory authorities, hospital administrators, and experts gathered to share innovative practices and valuable experiences, collectively contributing insights and efforts to the high-quality development of public hospitals.

Intelligent Medicine and Technology Transformation

The forum was jointly organized by the Harbin Institute of Technology, Shenzhen, the National Innovation Center for High-Performance Medical Devices, China National Medicines International Exhibition, and the Shenzhen Institute of Advanced Technology, Chinese Academy of Sciences. Building on its high-level and forward-looking characteristics, the forum focused on cutting-edge technological breakthroughs in intelligent medicine and their industrialization pathways. It aimed to establish a top-tier platform for exchange and collaboration, bringing together stakeholders from industry, academia, and research to collectively address the challenges in translating medical intelligence innovations and accelerate the transition of innovations from the laboratory to clinical practice.

New Intelligent Medical Diagnostic Technologies

Guided by the Guangzhou Municipal Bureau of Industry and Information Technology, the Municipal Market Supervision Administration, and the Municipal Health Commission, the 2025 Guangzhou In-Vitro Diagnostic (IVD) Industry High-Quality Development Conference & the 3rd Intelligent Medical Diagnostic Technologies Seminar was successfully held. The event was co-organized by Guangzhou Medical University, the Guangzhou In-Vitro Diagnostic Industry Development Association, and Interdisciplinary Medicine (IMed). During the conference, the Guangzhou In-Vitro Diagnostic Industry Development Association was officially established. This marks a milestone and symbolic milestone for the development of Guangzhou's IVD industry, as well as a critical step in Guangzhou's efforts to build a strategic industrial cluster in biomedicine.

Medical Device Circulation

The "5th Medical Device Circulation Forum of the Pharmaceutical Distribution Industry," jointly organized by the China Association of Pharmaceutical Commerce, the Medical Device Circulation Branch of the China Association of Pharmaceutical Commerce, and China National Medicines International Exhibition, was held in Guangzhou. Embracing the evolving era and regulatory requirements, the conference gathered industry insights under the theme of "New Engine for Compliance, Integration and Innovation for the Future." Leaders from relevant regulatory authorities, renowned domestic industry experts, scholars, and executives from prominent medical device companies engaged in in-depth discussions on three core dimensions: "Compliance as the Foundation, Innovation as the Driver, and Integration for Symbiosis." Through exchanges on policy directions, sharing of practical experiences, and collective wisdom, the forum explored cutting-edge trends and future growth opportunities.

The First CMEF Health Promotion Conference

Against the backdrop of the growing global burden of chronic diseases and accelerating population aging, the First CMEF Health Promotion Conference—hosted by Reed Sinopharm Exhibitions and supported by Guangzhou Hospital Association—was successfully held. Closely aligned with the requirements of the "Healthy China 2030" Planning Outline and the special campaign of the "Weight Management Year", the conference focused on the context of worsening global chronic disease burden, accelerated population aging, and the restructuring of public health systems, with the core goal of supporting the "Healthy China 2030" strategy and global health promotion objectives. It aimed to drive the industry's shift from a treatment-centered model to a health-centered one. Many industry experts shared insights from multiple dimensions, including community chronic disease and digital health management, the development of medical imaging, TCM rehabilitation for tumors, early screening and diagnosis of tumors, digital weight loss, full-chain management of severe diseases, and green medical practices. Covering the entire chain of "prevention, diagnosis, treatment, and rehabilitation", the conference provided comprehensive insights for health promotion.

The 92nd CMEF E-commerce Channel Conference

Amid the deep integration of the digital economy and the healthcare industry, e-commerce channels have evolved from a "supplementary channel" into a "new core track" and "key growth engine" for enterprises expanding their markets, with their strategic value continuing to intensify. The 92nd CMEF E-commerce Channel Conference brought together the Market Supervision Administration and leading domestic and international e-commerce platforms such as JD Health, Kuaishou, TikTok, Walmart Global E-commerce, and Alibaba International Station. The conference established an integrated platform for policy interpretation, practical experience sharing, and resource对接, helping enterprises avoid pitfalls and seize opportunities in their e-commerce channel strategies. It enabled participants to better understand the "new rules," "new strategies," and "new opportunities" in e-commerce channels. The event attracted over 200 participants on-site.

Exhibitors Highlights

YIHEDA

Yiheda founded in 2010, is a leading provider of R&D, production, and sales of automation components, offering one-stop sourcing for FA (Factory Automation) components. Specializing in the automation equipment industry, Yiheda designs standardized components and classifies selections based on application scenarios, leveraging standardization, product development, supply chain management (SCM), and platform-based operations driven by information technology and digitalization. Committed to delivering high-quality, cost-effective, and short-lead-time automation components, the company aims to optimize efficiency and reduce costs across the automation equipment industry.

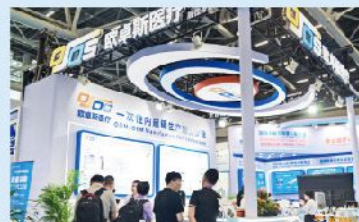

ZHONGHANG ELECTRONIC MEASURING INSTRUMENTS (XI' AN) CO.,LTD.

As a subsidiary of Aviation Industry Corporation of China (AVIC), Zhonghang Electronic Measuring Instruments focuses on the field of "Intelligent Measurement and Control" with shared technical origins and industrial roots. Its business covers four major segments: Aviation Military Products, Sensing and Control, Intelligent Transportation, and Industrial Software. It is a leading domestic enterprise providing military and civilian intelligent measurement and control products as well as system solutions. Its Sensing and Control components have been widely applied in numerous medical devices.

OJOS

Founded in 2015, Shenzhen Ojos Medical Co., Ltd. is based in a 1,500-square-meter modern production base in Shenzhen. It specializes in ultrafine wire processing for medical endoscopes (0.38mm/AWG46 grade), high-definition camera module packaging, and disposable endoscope complete machine manufacturing, providing global customers with full-chain solutions from R&D to certification.

Grzan Group

Grzan Group is a comprehensive technical CRO focusing on providing global market access regulatory registration consulting, clinical trial research, and inspection and testing consulting for medical device and in vitro diagnostic (IVD) product enterprises. Its main service items include: domestic and international clinical trials; regulatory registration consulting (covering China NMPA, Russia RZN, EU CE-MDR&IVDR, US FDA&510K, Australia TGA, UK MHRA&UKCA, Canada MDL&MDEL, India CDSCO, South Korea MFDS, Japan PMDA, Bangladesh DGDA, Southeast Asia, Central Asia, the Middle East (Saudi Arabia, the United Arab Emirates), Latin America (Brazil, Mexico, etc.), Africa, CIS countries, etc.); Free Sale Certificate; testing consulting; system consulting (MDSAP, ISO13485, QSR820, GMP, etc.); regulatory training; and local authorized representatives (EU Representative, US Representative, Southeast Asia Holder, Hong Kong Representative, Russian Representative, Brazilian Representative, UK Representative, etc.). It provides customers with one-stop technical solutions.

HUALIAN

Since its establishment in 1986, Hualian has specialized in the R&D, production, and technical services of automated packaging equipment for the pharmaceutical, daily chemical, and snack food industries. As a leading enterprise in the sector, it integrates innovation, manufacturing, and comprehensive solutions to meet global packaging demands.

Conference Highlights

Conference List

- 2025 Symposium on Innovative Applications and Development of Composites in Healthcare
- 2025 TÜV Rheinland Medical Device Regulatory Forum
- Capital · Ecosystem · Innovation: 2025 Medical Device Innovation Summit
- 2025 Technical Symposium on Medical Catheters/Guidewires
- Medical-Engineering Intersection and Achievement Transformation Conference
- The 3rd Symposium on Biodegradable/Absorbable Medical
- ELMAS Latest Medical Device Registration Regulations Interpretation in Russia, Brazil, North America, and India
- Focus on the Hot Spots of Global Medical Device Regulatory, Powering the Development of Enterprises
- The First High-End Medical Device Innovation and Development Forum
- The 3rd ICMD Science and Technology Roadshow
- SGS Medical Device Global Regulatory Forum

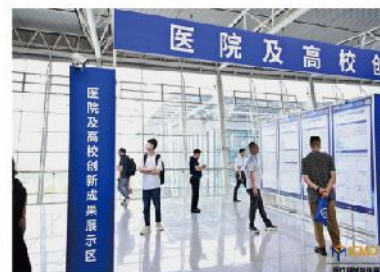

ICMD Science and Technology Roadshow

The innovative technology roadshow of the 3rd ICMD Technology Corner has been fully upgraded, focusing on the manufacturing technologies of home medical devices. The forum covers current hot topics, including but not limited to home blood glucose meters, respiratory devices, wearable devices, and aesthetic and nursing devices. A total of 11 senior executives and experts from medical device enterprises and medical device manufacturing supply chain enterprises were invited to jointly conduct discussions on tackling technical pain points in the manufacturing of home medical devices, explore the future development direction of equipment in combination with market demands, and promote technological innovation in the home medical field!

Innovative Achievements Exhibition Area for Hospitals and Universities

With the country's emphasis on the transformation of scientific research achievements, various provinces, municipalities directly under the Central Government and localities have successively issued a series of supporting policies to enhance hospitals' clinical research and achievement transformation capabilities. Promoting scientific research achievements from clinical practice to enterprise production can not only effectively drive the development of medicine and interdisciplinary integration but also improve hospitals' core competitiveness, promote synergistic progress between hospitals and enterprises, and create economic value for related industries. During the exhibition, a special exhibition area for achievements will be set up on the outdoor platform outside Hall 20.2. Several hospitals and universities will bring their latest scientific research achievements, covering innovative results in multiple fields such as clinical diagnosis, treatment technologies, medical device R&D, and medical informatization, comprehensively demonstrating the latest progress in medical innovation.

New Products at the Brain Science and Brain-Inspired Science Research Exhibition Area

The on-site Brain Science and Brain-Inspired Science Research Exhibition Area has attracted many enterprises to display cutting-edge technological products in the field of brain science. Examples include: Brain-Computer Interface (BCI)-Upper and Lower Limb Rehabilitation Training Robot for rehabilitation therapy; Brain-Computer Interaction Thought Input System for the rehabilitation of patients with language or motor function loss caused by amyotrophic lateral sclerosis (ALS), high paraplegia, locked-in syndrome (LIS) and other conditions; and BCI Intelligent Care System for disabled patients. These products have fully led the health and elderly care industry into the era of brain science and technology.

Health and Elderly Care Robot Exhibition Area: A Feast of Cutting-Edge Technology

The Health and Elderly Care Robot Exhibition Area has gathered 100+ products covering various body parts and functions, including: Passive Home Exoskeleton, AI Rehabilitation Robot, Lower Limb Gait and Balance Rehabilitation Training Robot, Companion Robot, Spinal Rehabilitation Robot, Elderly Care Robot, Cervical Spine Rehabilitation Robot, Intelligent Fascia Robot, All-Terrain Robot, and Traditional Chinese Medicine (TCM) Moxibustion Robot.

Conference Highlights

Guangdong Provincial Association of Rehabilitation Medicine Rehabilitation AI Science Popularization Competition

With the theme of "Technology Empowers Rehabilitation, Science Popularization Benefits People's Livelihood", this Rehabilitation AI Science Popularization Competition has attracted 273 contestants forming 59 teams (52 medical institution teams, 5 school teams and 2 enterprise teams). At the event site, Guangdong Provincial Association of Rehabilitation Medicine held a grand award ceremony for the winning contestants, and speeches for the election of leaders in the term change of the Science Popularization Branch of Guangdong Provincial Association of Rehabilitation Medicine were delivered. The event attracted about 200 professional audiences to attend.

Conference on High Quality Development of Elderly Health Services

This Conference Cooperates with Health Economics Association Guangdong of Guangdong Province for the First Time. The co-organizer invited nearly 200 experts and scholars from medical institutions in the field of geriatric health in Guangdong to attend the event. Focusing on industry management, cutting-edge technologies and hot topics in the industry, they conducted in-depth exchanges and sharing.

2025 Traditional Chinese Medicine (TCM) Tai Chi Culture Festival and Forum on Health Preservation, Preventive Treatment of Diseases & Health Management

More than 30 industry experts were invited to deliver keynote speeches and participate in roundtable forums at the event. National Tai Chi masters also gave on-site performances, and the conference attracted nearly 300 participants. The organizer also invited dozens of media outlets to conduct on-site interviews and reports.

Introduction

tHIS (The Health Industry Series) ASEAN, hosted by Reed Sinopharm Exhibitions in Kuala Lumpur, Malaysia, is a major international B2B event focusing on the healthcare, pharmaceutical and hospital construction sectors. It serves as a strategic extension of globally recognized exhibitions CMEF, PHARMCHINA, and CHCC, offering a platform for showcasing global innovations, tech advancements, and business networking.

As a key platform for technology, product launches, business networking, and market insights, THIS ASEAN is ideal for companies looking to enter the Southeast Asian market. The event will attract hundreds of industry leaders from various sectors, providing excellent opportunities for collaboration and understanding regional trends. The exhibition aims to connect with South-east Asia's healthcare professionals and industry leaders, driving development and enhancing global health.
